

GeNei™ Radial Immunodiffusion (RID) Teaching Kit

GeNei™ RID teaching kit is based on the formation of antigen-antibody precipitation ring around the well in agarose gel. This test is used for estimating antigen or antibody content in samples.

A view of **GeNei™** RID test results using the kit is shown in the following figure.

The kit provides materials sufficient for 15 experiments.

Materials Provided:

- Agarose
- Assay Buffer
- Antiserum
- Standard Antigens
- Test Antigens
- Gel Punch
- Glass Plates
- Template
- Instruction Manual
