

GeNei™ Counter Current Immuno-electrophoresis (CCIEP) Teaching Kit

In **GeNei™** CCIEP, immunodiffusion in gel is enhanced by electrophoresis of antigen and antibody and antigen-antibody precipitin line is formed within a short period. This technique is useful in screening antigen and antibody.

The kit contents are sufficient for 10/20 experiments.

Materials Provided:

- Agarose
- Electrophoresis Buffer
- Instruction Manual
- Antibodies
- Antigen
- Positive Control

Elpho Kit (Cat# 107073)

Specially designed mini size immuno electrophoresis apparatus and power supply unit (50 V/100 V) which can be ordered separately.
