

Native PAGE Reagent Kit (with marker)

Description: A Complete reagent kit for NATIVE PAGE Analysis. It is provided with Native PAGE marker.

Reagents supplied in the kit are sufficient to prepare 10 Native PAGE.

Materials Provided:

- 30% Acrylamide
- Resolving buffer
- Stacking buffer
- Electrophoresis buffer
- Sample Loading buffer
- Ammonium per sulfate
- TEMED
- Native PAGE Protein Marker

GeNei™ Silver Staining Kit with Marker (Protein)

Description: GeNei™ Silver staining kit provides fast, easy, reproducible and sensitive staining of proteins in SDS-PAGE gels in about two hours. The kit contains ready to use solutions which minimize preparation time and maximize ease of use and reliability. The kit content is sufficient to stain ten 15 X 18 cm gels.

Materials Provided:

- Fixing Solution
- Glutaraldehyde
- Sodium thiosulphate
- Sodium acetate
- Silver nitrate
- Sodium carbonate
- Protein Molecular Weight Marker Medium Range for Silver Staining
- Formaldehyde.

Storage 4° C.
